This was the final test of Jonathan's sacrificial love for David He might have remained silent, thus was willing to stand up and counted when it meant that h would not become king. Thus we see that true friendship is not always easy. It usually is very costly, but it pays big dividends in the coin of eternal wealth.

. . . FRIENDSHIP THAT COSTS A ND like as Jonathan stood up and witnessed his lasting friendship for David, at a very great cost, so are we today summoned to this ennobling type of friendship for Christ. "Ye are my friends if ye do whatsoever I com-

mand you," he once said. Young people find it rather costly to be loyal friends of Christ today. There are many siren voices that invite young people to take the low road-social drinking, gambling devices of one sort and another, satisfaction of sensual desires. But the true friend of Christ will withstand these voices, choosing rather the road of Christian gentlemen.

SACRIFICIAL FRIENDSHIP 66 TRIENDSHIP is the loveliest I flower in the garden of humanity," according to my cherished. friend, Dr. Hight C. Moore. would add this thought-true friend ship flowers in the garden of humanity, but it finds its life in the Garden of God's Perfect Eden. I have not known one single friendship that has impressed me that did not stem from above. "How can two walk together excep they be agreed?" And the only ce ment that will hold human hearts together-one soul in two bodiesis the grace of God. "Friendship is as God, who gives

and asks no payment," said Richard Hovey, and not until the human will is yielded to the will of God, even as was the will of Jonathan, can sacrificial friendship come to lower and to harvest. . . .

A club of ministers who use magic to illustrate religious lessons has been formed under the name of "Magi-Ministers." Most of the members practice amateur magic. One of their favorite tricks is the passing of a handkerchief through a tube marked "Church" which changes its color from black to white, illustrating how a blackened soul may be cleansed of sin.
